Dev Dixit

Product Designer who builds · Growth & conversion · AI-native prototyping

devdixit4522@gmail.com · devdixit.fun · linkedin.com/in/devdixit4522 · github.com/devdixit4522-ux · India · remote or relocate

Product designer (B.Des, 2026). My recent case studies work on funnel problems in consumer apps: first-time investing on Groww, event discovery on BookMyShow and checkout on Blinkit. I prototype in code with AI coding agents, and have designed and built an Android app and two web apps on my own.

SELECTED CASE STUDIES

Groww: guided "Start a SIP" · Activation — Jun – Oct 2026

Self-initiated concept · Working prototype, user tested · Figma, HTML/CSS/JS · devdixit.fun/work/groww

- Interviewed 15 people: **12 of 15 needed someone's go-ahead** before their first SIP. The blocker was trust, not choice.
- Designed a two-screen guided flow that turns four answers into one monthly amount and a pair of funds. Rejected and documented two earlier designs.
- Tested a working prototype with a small round of users; most said the guided plan would make them more confident to start.

BookMyShow: Events discovery · Discovery & cross-sell — Jul – Oct 2026

Self-initiated concept · Clickable prototype · Figma, Cursor · devdixit.fun/work/bookmyshow

- Found that undecided users default to Movies and leave without ever seeing Events (comedy, concerts, sports).
- Compared three ways to surface Events and chose an in-context "Also happening" row with a preview sheet; redesigned the homepage while keeping banner ads and "Browse by cinema" intact.
- Tested the prototype with **3 participants across 3 tasks**: finding Events and finding Movies both passed.

Checkout & e-commerce · Conversion — Aug – Nov 2025

- **Blinkit:** redesigned the address and payment steps of checkout using heuristic evaluation, CRO and behavioural design, and checked it in usability sessions.
- **Natureland Organics:** UX audit and homepage redesign for a job design assignment. **Led to a job offer.**

PRODUCTS I DESIGNED AND BUILT

RepGate · Android app — Sep – Oct 2026

Kotlin, Jetpack Compose, CameraX, MediaPipe Pose · demoed live in class

- Puts 10 camera-counted push-ups between you and an app you chose to limit. Positioned against 100K+ install competitors on a fair counter, honest friction and no paywall.
- Rep counter never over-counts (48 real reps counted, 19 half reps rejected across 13 recordings); gate caught 20 of 20 app opens; 109/109 unit tests. I made the product calls and tested on the phone.

Also built — Sep – Oct 2026

- **Kept** (Next.js, Supabase, kept-jet.vercel.app): a habit tracker shared with one partner, with a shared streak and a Nudge when they go quiet. Wrote the PRD.
- **NameGenius** (Gemini API, GitHub): AI brand naming with an "anti-brief" filter and live domain checks; used by early testers.

EXPERIENCE

Freelance Product Designer · PrayagrajKumbhMela.com — Dec 2024 – Jan 2025

- Designed the mobile-first booking website for Mahakumbh Mela 2025, mapping flows and IA so services were easier to discover. The site went live for the event.

UI/UX Design Intern · Campaign Studio — Aug – Dec 2024

- Wireframes and user flows for lead-generation website redesigns, plus competitor and pricing research. Automated the team's web data collection with Python, saving **about 5 hours a week**.

BUILDING WITH AI

- Built RepGate, Kept and NameGenius with Claude Code, Cursor and Antigravity; RepGate ran as a multi-agent build (planner, builder and designer agents).
- Wrote custom Claude Code skills for design work: scoring case-study ideas, walking user personas through a prototype to find drop-off points, and turning interview notes into a design brief.
- Move between Figma and code with Figma MCP; taught classmates Claude Code and Cursor.

SKILLS

Product & growth	AARRR funnels, activation and conversion design, CRO, A/B test hypotheses, PRDs
Research & design	Interviews, JTBD, usability testing, user flows, IA, UI, design systems, Figma, Framer
Build & AI	React, Next.js, Tailwind, Kotlin, Supabase, Python · Claude Code, Cursor, Antigravity, LLM APIs

EDUCATION

B.Des, Product & Industrial Design · Lovely Professional University — 2022 – 2026

Coursework complete, results awaited · Google UX Design Professional Certificate · Hindi (native), English (professional)
